Re: Notice of Deficiency for the 304 Concretion Facility Notice of  
Deficiency Response Table Dated October 17th, 1991.

Dear Ms. Rodriguez:

This letter transmits Ecology's Notice of Deficiency (NOD) for the 304 Concretion Facility Closure Plan Revision 1 and accompanying NOD Response Table dated October 17, 1991. The majority of the outstanding issues for the 304 Concretion unit concern the closure performance standards. These standards were recently issued in the Nuclear and Mixed Waste Management Program Soil Clean-up Remediation Policy (SCP).

The Notice of Deficiency comments are intended to be a guide to the major outstanding sections of the closure plan which are currently unresolved, and which will be impacted by the SCP. In addition, there are some interpretive comments regarding application of the SCP to the 304 Concretion unit. It is anticipated that upcoming Unit Manager meetings will be concerned with the specifics on how Ecology and Westinghouse Hanford Company foresee applying the SCP to this unit. These specifics will then be incorporated into the closure plan. The Soil Clean-up Remediation Policy is included with this transmittal.

If you have any questions, please contact me at (206) 493-9425.

Sincerely,

Handwritten signature of Scott E. McKinney in cursive.
